SOFTWARE PROPOSAL

KUSUG-PA

Sugarcane Crop Management & Recording System

with Integrated Check/Voucher Printing System

Prepared for:

Kabankalan United Sugarcane Growers and Planters Association

Kabankalan City, Negros Occidental, Philippines

Prepared by:

Web Development Team

Date Issued: **May 2026**

Valid Until: **August 31, 2026**

Reference No.: **KUSUG-SYS-2026-001**

1. Executive Summary

This document constitutes a formal software proposal for the design, development, and delivery of the KUSUG-PA Sugarcane Crop Management & Recording System — a purpose-built digital platform tailored to the operational needs of the Kabankalan United Sugarcane Growers and Planters Association (KUSUG-PA).

KUSUG-PA has been a cornerstone of the Kabankalan agricultural community since its establishment in 2014. As the association continues to grow its membership and expand its role in facilitating sugarcane delivery, government assistance programs, and financial services for its planters, the need for a centralized, reliable, and secure digital system has become paramount.

The proposed system, herein referred to as the KUSUG-PA System, is designed to digitize and automate the association's core workflows — from planter registration and crop delivery recording, to check voucher printing, loan management, and financial reporting. This will significantly reduce manual errors, improve data integrity, and empower the association's leadership with real-time analytics for sound decision-making.

This proposal outlines the system's complete module specifications, the proposed pricing structure — including online cloud hosting fees — payment terms, and post-delivery support arrangements. The system is deployed and accessed entirely online; no local server infrastructure is required from the client.

2. About the Client

Organization	Kabankalan United Sugarcane Growers and Planters Association (KUSUG-PA)
Founded	2014
Location	Kabankalan City, Negros Occidental, Philippines
Industry	Agriculture — Sugarcane Farming & Planters Association
Affiliation	Sugar Regulatory Administration (SRA) — Government Partner
Primary Role	Collective bargaining, machinery services, government program facilitation, and financial support for member planters in the Negros sugar industry

3. Project Overview

The KUSUG-PA System is a cloud-hosted, web-based information and management platform developed specifically for the association's administrative, financial, and operational requirements. Being entirely online, the system is accessible from any device with an internet connection — no on-site server setup required. The system addresses the following key business needs:

- Centralized recording and management of planter delivery data and proceeds on a weekly basis
- Automated generation and printing of check vouchers for registered planters based on current quedan and molasses pricing
- Accurate and timely management of planter loans and cash advance deductions from net proceeds
- Secure and role-based access for association staff and administrators
- Generation of summary and operational reports for audit, compliance, and strategic planning
- Real-time dashboard analytics to support leadership decisions
- Complete audit logging for transparency and accountability

4. Scope of Work — System Modules

The following eleven (11) modules are included in the scope of this software development engagement:

Module 1: Dashboard & Analytics

The main landing page of the system providing a high-level overview of the association's current operational status. Designed for quick decision-making by administrators and management.

- Key performance indicators (KPIs) for planter deliveries, proceeds, and active loans
- Recent activity log for traceability and accountability
- Top planters ranking based on crop delivery volume or proceeds
- Price update feeds for Quedan and Molasses pricing
- Graphical charts and summaries for trend analysis

Module 2: Check / Voucher Printing System

A critical function of the system that handles the generation and printing of check or cheque vouchers for planters who have made deliveries to the sugar mill. These vouchers serve as the official document exchanged at the bank for cash proceeds.

- Supports 1,000+ planter records with automatic computation of net proceeds
- Auto-deduction of loans, cash advances, and all applicable fees
- Customizable print layout to match the actual physical size of the check voucher
- Print preview and batch printing capability per week or per planter
- Accurate pricing based on the current week's Quedan and Molasses prices

Module 3: Quedan and Molasses Registry/Buying

A dedicated registry module for managing quedan and molasses buying records, ensuring accurate tracking of all sugar and by-product transactions.

- Centralized registry for all quedan certificates issued to planters
- Molasses buying record management per delivery
- Linkage to planter profiles and weekly delivery data
- Historical lookup of quedan and molasses transactions by crop year and week
- Validation against duplicate or erroneous entries

Module 4: Weekly Uploads/Updates

A secure data ingestion module for uploading the weekly summary of planter deliveries and all associated financial components.

- Upload and store weekly planter delivery summaries
- Handles: Planter Proceeds, Trucking Allowance, Fresh Cane Incentives, Fuel Charges, Equipment Rentals, Underloading, and Transloading Fees
- Data validation and duplicate upload prevention

Module 5: Crop and Week Management

A configuration module that manages the active crop year and week numbering system, ensuring all transactions are properly timestamped and organized.

- Set and manage the active Crop Year (e.g., 2025-2026)
- Define and update Week Numbers corresponding to each delivery period
- Lock or close weeks after finalization to prevent unauthorized changes
- View historical crop year and week structures
- Automatic validation to prevent overlapping or incorrect week assignments

Module 6: Price Management

A configuration module that manages the pricing data used for computing planter proceeds. Ensures printed vouchers always reflect the correct and current pricing for each crop week.

- Update and maintain the current Quedan Price
- Update and maintain the current Molasses Price
- All changes logged with date and user for full auditability

Module 7: Report Generation

A reporting module that allows authorized users to generate and print formatted reports from all uploaded weekly data — essential for internal audits, board meetings, and SRA compliance.

- Generate printable reports from all weekly uploaded data categories
- Filter reports by week, crop year, or planter
- Summary and detailed report formats with export-ready layouts
- Export to PDF, Excel, or print directly
- Pre-built report templates for common association needs

Module 8: Planter Profile Management

A master data management module for maintaining the official registry of all planters affiliated with KUSUG-PA.

- Register new planters with complete profile details
- Manage active and inactive planter status
- No limit on planter records — scales with association growth
- Planter ID management for system-wide reference

Module 9: Loans & Cash Advance ★ Premium Module

The most complex module in the system. Handles the full lifecycle of planter loan and cash advance transactions — from recording and approval to automated, schedule-aware deductions tied to actual harvest delivery weeks. This module requires advanced financial logic and real-time integration with the check voucher system.

- Record planter loan and cash advance transactions with full details
- Set flexible payment schedules and amortization terms per planter
- Automatic deduction from net proceeds at the time of voucher generation — regardless of which week the planter harvests
- Real-time outstanding balance tracking and running ledger per planter
- Full loan history and transaction logs for audit purposes
- Loan eligibility validation based on active membership status
- Edge case handling: partial payments, multiple active loans, carry-over balances

Module 10: User Management & Access Control

A system administration module governing access and permissions for all system users through role-based access control.

- Create and manage system user accounts
- Assign user roles (e.g., Administrator, Staff, Viewer)
- Control module-level access permissions per role
- Deactivate or suspend user accounts
- Login activity and access logs for security monitoring

Module 11: Audit Logs

A comprehensive logging module that records all user activities and system changes for security, compliance, and troubleshooting purposes.

- Automatic recording of all creates, update, delete operations
- Timestamp and user identification for each action
- View and filter logs by date, user, module, or action type
- Export audit trails for external review or SRA compliance

- Immutable log storage — logs cannot be altered or deleted by regular users
- Login activity and access logs for security monitoring

5. Pricing Structure

The following pricing has been prepared with the association's operational budget in mind. This is a startup software investment designed to provide maximum value at a reasonable entry cost. All amounts are in Philippine Peso (PHP). The system is hosted entirely online — no local server is required.

Online Hosting Notice

This proposal covers a cloud-hosted, web-based system. Online hosting fees are billed separately as a monthly line item and are required for the system to remain accessible over the internet. Local server setup and maintenance are NOT included in this engagement.

5.1 One-Time Software Development Fee

This is a one-time payment covering the complete design, development, testing, and delivery of all eleven (11) system modules as described in Section 4.

#	Module / Component	Type	Amount (PHP)
1	Dashboard & Analytics	One-Time	Included
2	Check / Voucher Printing System	One-Time	Included
3	Quedan and Molasses Registry/Buying	One-Time	Included
4	Weekly Uploads/Updates	One-Time	Included
5	Crop and Week Management	One-Time	Included
6	Price Management		
7	Reports Generation		
8	Planter Profile Management	One-Time	Included
9	**Loans & Cash Advance Management ★ Premium Module**	One-Time	Included
10	User Management & Access Control	One-Time	Included
11	Audit Logs	One-Time	Included
	TOTAL ONE-TIME SOFTWARE DEVELOPMENT FEE		**PHP 82,000.00**

5.2 Online Hosting Fee (Cloud-Based)

The system is deployed on a cloud hosting environment, making it accessible online from any device. The hosting fee is a recurring monthly charge billed separately from the subscription fee and covers server infrastructure, domain upkeep, and SSL security.

Hosting Coverage	Billing	Monthly Rate (PHP)
Cloud server (VPS) — system hosting and uptime	Monthly	**PHP 500.00**
SSL Certificate (HTTPS security)	Monthly	Included
Domain name management	Monthly	Included
Automated daily data backups (cloud storage)	Monthly	Included
ONLINE HOSTING FEE — MONTHLY		**PHP 500.00 / mo.**

Note: Hosting fees apply from the month of system deployment and continue for as long as the system remains online. This fee is billed in addition to the monthly subscription and applies from Year 1 onwards.

5.3 Year 1 — Monthly Subscription (Included in Contract)

Upon system delivery, the first year of software support, maintenance, and licensing is covered under a monthly subscription. This ensures continued stability, security patches, and minor feature adjustments throughout the first crop year.

Coverage	Duration	Monthly Rate (PHP)
Bug fixes and minor system updates	Month 1–12	Included
Technical support (remote, via messaging or call)	Month 1–12	Included
System monitoring and performance checks	Month 1–12	Included
Software license fee	Month 1–12	Included
YEAR 1 MONTHLY SUBSCRIPTION RATE		**PHP 7,000.00 / mo.**

Note: Subscription is billed from the month of deployment. Total Year 1 subscription cost: PHP 84,000.00 (12 months). This is separate from the hosting fee.

5.4 Succeeding Years — Optional Software License Renewal

After the first year, KUSUG-PA may renew their software license and support subscription on a continuing basis. This is entirely optional and will not be automatically renewed.

Coverage (Year 2 Onwards)	Billing	Monthly Rate (PHP)
Continued bug fixes and compatibility updates	Monthly	Included
Technical support (remote assistance)	Monthly	Included
Software license renewal fee	Monthly	Included
YEAR 2 ONWARDS — MONTHLY LICENSE RENEWAL RATE		**PHP 7,000.00 / mo.**

Note: The association will be notified 30 days before Year 1 expires. Renewal can be monthly or annual pre-payment. The online hosting fee of PHP 500.00/month applies continuously regardless of renewal status.

5.5 Investment Summary

Fee Component	Amount (PHP)
One-Time Software Development Fee (Modules 1-11 — Base)	**PHP 90,000.00**
Online Hosting Fee — Year 1 (PHP 500.00 x 12 months)	**PHP 6,000.00**
Year 1 Monthly Subscription (PHP 7,000.00 x 12 months)	**PHP 84,000.00**
TOTAL FIRST-YEAR INVESTMENT (Development + Hosting + Subscription)	**PHP 180,000.00**
Year 2 Onwards — Monthly License Renewal (Optional)	**PHP 7,000.00 / mo.**
Year 2 Onwards — Online Hosting Fee (Continuous)	**PHP 500.00 / mo.**

6. Payment Terms

Milestone	Description	Amount Due
Milestone 1	50% Downpayment — Upon signing of Service Agreement	**PHP 45,000.00**
Milestone 2	50% Balance — Upon system delivery and client acceptance	**PHP 45,000.00**
Monthly	Year 1 Subscription — Billed monthly from deployment date	**PHP 7,000.00 / month**
Monthly	Online Hosting Fee — Billed monthly from deployment date (Year 1 & onwards)	**PHP 500.00 / month**
Optional	Year 2 Onwards — License renewal (optional, not automatic)	**PHP 7,000.00 / month**

7. Terms and Conditions

7.1 Scope Inclusions

- All eleven (11) modules as described in Section 4 are included in the one-time development fee
- One (1) on-site or remote onboarding and training session for association staff
- Free bug fixes and issue resolution during the entire Year 1 subscription period
- System deployment to a cloud-hosted, web-accessible environment
- SSL certificate and domain management included in the monthly hosting fee

7.2 Scope Exclusions

- Local server hardware or on-premises infrastructure is **NOT** part of this engagement
- Hardware procurement (computers, printers, network equipment) is not included
- Major feature additions or new module development beyond the agreed scope are subject to separate quotation
- Internet or data connectivity costs are the responsibility of the client
- On-site visits beyond the initial onboarding session may be billed separately

7.3 Delivery Timeline

- Estimated development and delivery timeline: 45 to 60 business days from downpayment receipt and client data submission
- Client is expected to provide planter data, required fields, and sample documents (e.g., check voucher template) within five (5) business days of signing.

7.4 Data Privacy & Ownership

- All data entered and stored in the system belongs exclusively to KUSUG-PA
- The developer shall not share, sell, or disclose any client data to third parties
- Reasonable security measures including encrypted connections (HTTPS) will be implemented

7.5 License & Intellectual Property

- Upon full payment of the one-time development fee, KUSUG-PA is granted a perpetual license to use the software
- The source code remains the intellectual property of the development team
- The client may not sell, sublicense, or redistribute the software to third parties

7.6 Hosting Continuity

- If the hosting fee is not renewed, the system will be temporarily suspended until payment is settled
- Data will be retained for a maximum of sixty (60) days after hosting lapse before deletion
- The association will be notified 14 days in advance of any hosting suspension

7.7 Proposal Validity

- This proposal is valid for sixty (60) days from the date of issuance
- Pricing and terms are subject to revision after the validity period

8. Security & Safety

The KUSUG-PA System is built with security as a top priority because it handles planter money (vouchers, loans, cash advances) and personal information. The following safety measures are in place:

8.1 Your Data is Locked & Protected

- All planter information and financial records are encrypted — think of it like putting documents inside a safe that only the system can open
- Passwords are never stored in plain text — even the developer cannot see user passwords

8.2 Only Authorized People Can Access

- Role-based access means an ordinary staff member cannot print vouchers or approve loans unless given permission
- The system logs out automatically after inactivity
- Multiple failed login attempts will temporarily lock the account to prevent hacking attempts

8.3 Secure Connection & Backups

- HTTPS/SSL encryption (included in hosting fee) — like a sealed envelope for your data
- Automated daily backups — we can restore your data if something goes wrong

8.4 Complete Activity Logs (Module 11)

- Notify us within 24 hours — we will investigate and provide solutions within 48 hours
- Nothing can be deleted without a trace

8.5 What Happens If Something Goes Wrong?

- All planter information and financial records are encrypted — think of it like putting documents inside a safe that only the system can open
- Fixes are free during your active subscription

8.6 Your Responsibility

- Use strong passwords
- Do not share login credentials
- Use strong passwords and do not share logins
- Keep office computers free from viruses

9. Closing Statement

We are confident that the KUSUG-PA Sugarcane Crop Management & Recording System will be a transformative tool for the association. Our team is committed to delivering a reliable, secure, and cloud-accessible platform that serves the planters and leadership of KUSUG-PA with the same dedication that the association has shown to the Kabankalan farming community for over a decade.

We look forward to the opportunity to partner with KUSUG-PA on this important project. For any questions, clarifications, or to proceed with the agreement, please do not hesitate to reach out.

Prepared by: Accepted and Agreed by:

MICHAEL A. BALIVIA
